

My

Butterfly

Journal

September 23, 2015 Day 1
My butterfly larva arrived today. One was named Ketchup. The other was Mustard. Ketchup was crawling and munching on his food. While Mustard was lazy and sleeping in his food! They were both 1 centimeter.

Ketchup	Mustard
	
describe: active	describe: lazy
	

September 24, 2015 Day 2

Today I learned it takes 17 (about 2 weeks) days from when the caterpillar hatches, until it turns into a butterfly. I will try to count the days.

September 25, 2015 Day 3
Today I learned that some
butterflies (when its winter)
migrate to California! Also,
Ketchup was on his lid!
While, Mustard was always
munching everywhere!

September 29, 2015 Day 7

Today, Mustard started making his crysalis! Katchup is a bit young but he's still big. Today, I learned it doesn't take that long for a larva to start making its chrisaliss!

October 1, 2015

Day 9

Today, Ketchup is in a J. Mustard
is HUMONGOUS!!!!!! They
are both growing up. 😊

October 2, 2015 Day 10

Today I studied my caterpillars.

On Monday, I make an estimate that my larva will be getting ready to form their pupa. I just hope I'm right!

October 5, 2015 Day 13

Today Ketchup made his chrysalis!

Mustard is STILL getting his pupa ready. I hope they're both going to be great children!

October 13, 2015

Day 21

Today, butterflies started coming out of pupas! Ketchup is still in his pupa, but I still have hope that he'll come out soon! Mustard has already hatched! He's with the other butterflies! Soon, my 2 little boys will go into the wild! I'm so PROUD.

October 16, 2015 Day 24
Today Mustard is free. He's out
in the wild; looking for a mate.
Meanwhile, Ketchup is still in
his chrysalis. He's been in there
for 1 week and 6 days! My
boys are grown up!
