

My Butterfly

Journal

September 23, 2013

Day 1

Today I got my butterfly larva arrived.

When I got Charmé she was hanging upside down and moving a lot. When I got Silvio

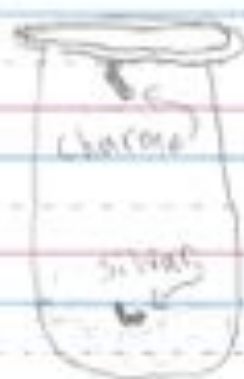

it looked like she was dead. Write now

my butterfly larvae were cm long. When I

got my butterfly larva I thought it would

be as long and as fat as my finger

but it's not.

September 24, 2015

Day 2

Today I learned that a larva is the same thing as a caterpillar. I also learned that it takes about 2 weeks to become a butterfly.

September 25, 2016

Page 3

I learned that butterflies have different parts than caterpillars. I also learned that butterflies fly south to their winter homes.

September 29, 2015

Today my son that my Butterfly larva
 was eating more than it was a couple days
 ago. Also my catipillar got very, very, very big
 and longer than before.

October 1, 2016

Day 9

Charm is making her pupa so it's silver.

I learned from Mrs. Wattle that
the cattipillars form a j like this

October 2 2015

Silver is starting to make her ^{dad's} papa. I think

Silver will be in her papa when I come

back on Monday. I think Charm will

be in her T shape on Tuesday or Monday.

October 5, 2016

Day 13

Over the weekend Charm made her chrysalis.

The color of the chrysalis is sort of

gray. Silvar is already in her chrysalis

she made hers last Friday.

October 13 2016

Today 1 of my caterpillars turned into a butterfly. I think my other butterfly will hatch soon. They were smaller than I expected.

Yesterday we got to let a tatterfly
land on us. When I got mine it crawled
on my hair band flower. After that
we let them all go and it was
beautiful. I still have charme but
I think shes dead.
