Butter fly

Journal

5
September 23, 2015

Day 1

Today my 2 butterfly larva
got here. The names are
little man and little man jr.
They have not moved yet.
They are black and furry. They
are really small. They are a
cm. long.

September 24, 2015

Day 2

Today I learned that one of my caterpillars got a little bit bigger. They still have not moved a lot only a little. I learned it takes 18 days for a caterpillar to turn into a butterfly.

October 1, 2015

Day 9

The caterpillars are starting to make their pupa. I learned that birds will not eat all butterflies. I also learned that some butterflies are on the in danger list.

September 25, 2015 Day 3

I learned that butterflies
go to Mexico for winter.
The caterpillars I have
will turn in to painted
ladies.

September 29, 2015

Day 7

One of my caterpillars is getting big and the other one is still small. I learned that a butterfly has nobis and a moth does not.

October 2, 2015

Day 10

None of them have made
their pupa. I think they will
on Monday.

October 5, 2015

Day 13

One of my caterpillars made a pupa. The other one is still too small to make its pupa. I can't wait for the butterfly.

October 13, 2015

Day 21

The pupa hatched in to a butterfly! 2 of them got out of the tent. One of mine did not hatch. The one that did hatch had its wings get crumbled up. They are painted ladies. One of them died.

October 16, 2015

Day 24

Yesterday we let the
butterfly's go. We still
got one of the butterfly's.
We only have him because his
wings are crumbled up. We
might keep him for the
school year.
