

My

Butterfly

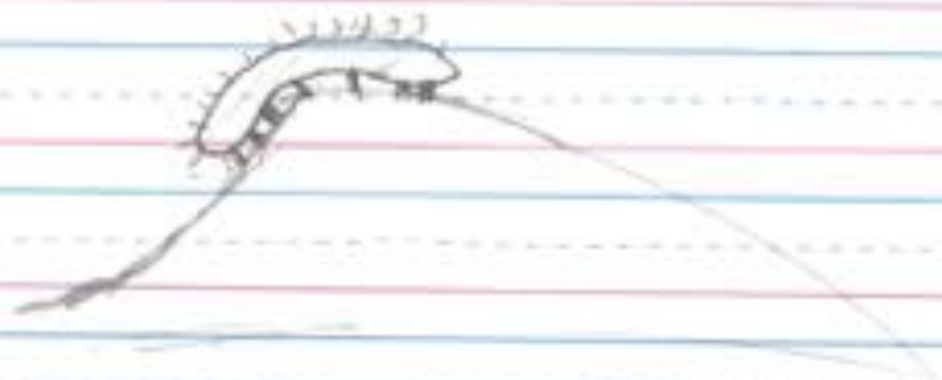

Journal

grd/Good

September 23, 2016 Day 1

Today my butterfly larva arrived!
Their names are Ries and Rocky.
They are about 1cm long. Today Ries
was crawling and Rocky was sleeping.
They are both hairy.

September 24, 2015

Day 1

Today I learned a larva sheds
its skin. I also learned a larva
changes before it's in its
Pupa.

September 25, 2015 Day 3

To day I learned that some
butterflies fly to California.
I also learned some fly to Mexico.
Also I learned some fly over the
outline of Mexico.

September 9, 2005

Day 7

My Larva have webs. My larva are very, very fat! I think they are almost ready to spin their pupas.

October 1, 2013

Day 9

I learned the larva will
make a "J" form when making
thier pupa. My larva is making the "J"
form now

October 2, 2015

Day 10

I think my two larva will have
pupae on Monday. My tank are on
the top now.

October 5, 2015

Day 13

Both of my Larva are in their
chrysalis. I thought they
would be bigger.

October 13, 2015 Day 21

Both of my batter flies
have hatched. 18 in all of ours
have hatched. Some of them
have died.

October 16, 2015 Day 24

Yesterday we let all of our butterflies go. Some of them tried to stay in the tent. It was really cool to see them flutter off.
